## **Author Miki Starr Unveils *The Goldenborn Legacy: Rebirth, Rise, and Reckoning* — a Trilogy Told Through Both Story and Sound**

**ST. PAUL, MN — January 20, 2026**

Author and producer **Miki Starr** introduces an immersive new way to experience fiction with *The Goldenborn Legacy: Rebirth, Rise, and Reckoning*—a cross-media trilogy that unites literature and music into a single, cinematic journey.

Each installment pairs a full-length novel with a companion soundtrack performed by the fictional Marinite artist **Maren Kai**, transforming every emotional beat of Starr’s sci-fi-fantasy epic into living sound. Together, the books and albums trace the rise of **Olivia Vala Eso Kalaath**—the Anointed Daughter of the Marinites—across a world torn between faith, rebellion, and divine destiny.

### **A New Voice Redefining Storytelling**

A lifelong writer making her public debut as a cross-disciplinary creator, Starr blends world-building, language creation, and modern production to blur the boundary between page and performance.

“For me, music isn’t an accessory to story—it *is* story,” Starr says. “Every lyric reflects a moment or theme, every drumbeat carries the pulse of my characters’ choices. The soundtracks let readers hear the world of the Goldenborn and experience storytelling in a new, immersive way.”

From the ancestral chants of *Rebirth* to the soul-torn duets of *Rise* and the militant anthems of *Reckoning*, the three albums span Afro-futurist gospel, cinematic neo-soul, and atmospheric R&B. Each track was written, arranged, and produced to reflect a specific chapter moment—grief, defiance, revelation, or triumph—making *The Goldenborn Legacy* one of the few literary projects scored from the inside out.

### **About the Project**

- *The Goldenborn Legacy* unfolds across three novels—*Rebirth of the Anointed*, *Rise of the Anointed*, and *Reckoning of the Anointed*—set within the expansive Zephyrnox Theta system.

- Each book features a complete companion soundtrack, composed and produced by Starr under her in-world alias **Maren Kai**.
- The music was built using cutting-edge, AI-assisted production tools to capture textures impossible to achieve through traditional scoring—while remaining emotionally human and spiritually rooted.
